

## TERRILL KNAACK

Nationally recognized wildlife and landscape artist:

My paintings are designed to awaken emotions and to inspire contemplation and healing. The intellect is important in the creation and understanding of art, however it is in what the viewer senses and feels where in the meaning of the piece is found. My paintings are not meant to be a description. They are a suggestion. If the viewer finds them beautiful I hope they will inspire a sense of responsibility to the life around us to which we are intrinsically connected.
